Acknowledgements

I am greatly indebted to my supervisor, Associate Professor Suchada Siripant and Professor Dr. Chidchanok Lursinsap, for their suggestions, untiring help and guidance of this thesis. Without them my thesis would have never been accomplished.

I also wish to express my special thanks to the thesis committee, Assistant Professor Dr. Jack Asavanant and Assistant Professor Dr. Peraphon Sophatsathit, for their valuable advise, reading and criticizing the manuscript. I would like to thank my superior offices for their permission to take leave, my colleagues at Department of Mathematics and Computer Science, Faculty of Science and Technology, Prince of Songkla University, Pattani Campus.

This work is partially supported by a grant from TJTTP project through a collaboration with Professor Y. Shinagawa of the University of Tokyo, Japan. I would like to thank Dr. Jim Hanan for his information, suggestions and discussions of this research, Professor Przemyslaw Prusinkiewicz for his permission to use the L-studio software, Mr. Salin Phuvipadawt and Dr. Preeda Boon-long for furnishing information of plant growth.

Furthermore, I would like to thank all my past and present instructors for their valuable lecture and instructions. Finally, I would like to express my sincere gratitude to my parents for their love, hearty encouragement and unselfish sacrifice during my study.

I truly believe that all people whom I have not personally mentioned here are aware of my deep appreciation.
