

List of Figures

	Page
Figure 1.1 The development example of L-system	2
Figure 3.1 Construction of the snowflake curve	10
Figure 3.2 Example of a derivation in a DOL-system	11
Figure 3.3 Development of a filament (<i>Anabaena catenula</i>) simulated using a DOL-system	12
Figure 3.4 Turtle Interpretation of String	13
Figure 3.5 Generating a quadratic Koch island	14
Figure 3.6 Controlling the turtle in three dimensions	16
Figure 3.7 Bracketed string representation of an axial tree	17
Figure 3.8 Example of plant-like structures generated by bracketed OL-systems	19
Figure 3.9 A three-dimensional bush-like structure.....	20
Figure 3.10 Construction of the E-curve on the square grid	22
Figure 3.11. Recursive construction of the Hilbert curve in term of replacement	22
Figure 3.12 The initial sequence of strings generated by the parametric L-system specified in prototype 3.2	25
Figure 4.1 Diagram of plant simulation and visualization	27
Figure 4.2 A simple L-system Interpretation	29
Figure 4.3 Axiom = $I[+iL][-iL]A$	32
Figure 4.4 The component order of L-system string	33
Figure 4.5 All internodes and petioles	35
Figure 4.6 All internodes number	36
Figure 4.7 The parent of each internode and petiole	37
Figure 4.8 The level of each component	39
Figure 4.9 The visualize after adding leaf and flower to the system	39
Figure 4.10 The top view of <i>Plant2</i> prototype	40
Figure 4.11 The internode and petiole of soybean at second iteration	41

	Page
Figure 4.12 The internode and petiole order number	41
Figure 4.13 The level of all internode and petiole	42
Figure 4.14 The soybean and its leaves	42
Figure 4.15 The top view of the soybean	43
Figure 4.16 The soybean physiology	51
Figure 4.17 Internode data	52
Figure 4.18 Petiole length data	52
Figure 4.19 Leaf length and width data	53
Figure 4.20 Sigmoidal curve approximation	53
Figure 4.21 An algorithm for calculation the sigmoidal curve	55
Figure 4.22 The approximated growth function of I , i , P , p , L , and A	57
Figure 4.23 The Structure of simulation generated from the production rules of soybean in Section 4.3	58
Figure 4.24 Internode of plant topology	59
Figure 4.25 Internode plant	59
Figure 4.26 The cylinder and sphere argument	60
Figure 4.27 The petiole and the main stem of plant topology $I-I][+I]I$	61
Figure 4.28 The leaf of plant topology	64
Figure 4.29 A simple plant with its leaves $I[-iL][+iL]A$	65
Figure 4.30 A simple plant with its leaves and flower: $I[-iL][+iL]iiF$	66
Figure 4.31 Some flower plant topology	66
Figure 4.32 The texture coordinate	67
Figure 4.33 A texture mapping with leaf polygon	68
Figure 4.34 The leaf texture mapping	68
Figure 4.35 A simple plant with its leaves and flowers	69
Figure 4.36 Plant and their component with textured leaves	70

	Page
Figure 4.37 A soybean textured leaves with <i>Soybean</i> prototype using Two iterations	70
Figure 4.38 The soybean as follows Section 4.3 using 6 iterations	71
Figure 4.39 The soybean as follows Section 4.3 using 6 iterations with Textured leaves	71
Figure 5.1 Simulation and visualization of Soybean shoots expansion Over 61 days	76
Figure 5.2 Different parameters of same topology of L-system	77
Figure 5.3 The spiral plant	80
Figure 5.4 The spiral plant with new the different leaves and flowers ...	80
Figure 5.5 The simple tree	81
Figure 5.6 The applied soybean plant	82
Figure 6.1 The plant growth using L-studio software at time=5 to t=46 ..	84
Figure 6.2 The plant growth using L-studio software at time=47 to t=88 .	85
Figure 6.3 The plant growth using PlantVR software at time=5 to t=46 with growth rate 4.0	86
Figure 6.4 The plant growth using PlantVR software at time=47 to t=88 with growth rate 4.0	87
Figure 6.5 The visualized image of axiom	90
Figure 6.6 The plant growth using PlantVR software at time t=5 to t=46 with growth rate 1.70	91
Figure 6.7 The plant growth using PlantVR software at time t=47 to t=88 with growth rate 1.70	92
